## EDUCATION

**San Jose State University**
2020 - 2023
B.S. in Computer Science

**Ohlone College**
2017 - 2019
CSU GE Plan

## SKILLS & LANGUAGES

- C/C++, Java, Python, MySQL
- HTML, CSS, Javascript, React
- Git/Github, UNIX, Linux
- Adobe Creative Suite, G Suite, Office365
- Multilingual: Mandarin, Cantonese, Malay, English

## DEAR HIRING MANAGER,

I have a passion for utilizing technology to make an impact on my organization and improve people's lives. I recently graduated from San Jose State University as a Computer Scientist. As a proud Spartan, I'm eager to use what I've learned from school and my past internship to improve people's lives. I have more than four years of experience with programming languages such as HTML, CSS, Javascript, Python, Java, and C/C++, and proficient in creating interactive mockups using AdobeXD and Figma to demonstrate user flows and validate design concepts. I have a keen eye for aesthetics and strive to deliver a pixel-perfect design that cohesively merges technical depth and visual appeal.

I believe that anything substantial and impactful cannot be done alone and must require a collaborative effort from each team member, which is why I always find ways to learn new things that will enhance my skills, but also allow me to lift those around me. I practice this mindset in every collaborative opportunity, and as a result, allowed me to learn complex libraries like React in a short time, and also able to introduce this technology to the team during my senior year and provide guidance to my teammates, allowing us to improve the overall technical depth of our project.

Thank you for considering my application. I'm excited about the opportunities your organization provides and would greatly welcome the opportunity to discuss how my skills and experience could help better your organization. I have also attached my resume for your reference. Should you have any questions, I'm more than happy to answer through my email or phone number. Thank you.
